

I have been an advocate for public education my entire active and retired years. Having served on the VEA and NEA Board of Directors and as President of the Virginia Education Retired Educators, I am aware of the many challenges the association faces.

The VEA is a long standing organization that stands for the rights of educators and the children of Virginia. They are continually working to identify strengths, potential partners, and ways to support our educators to ensure that every child in Virginia is provided with a quality public education from kindergarten through college. As a delegate to the VEA Representative Assembly, you can count on me to support the issues that promote and enable our educators to better assist our students.

Thank you for your past support. I enthusiastically look forward to representing you.

Ernest M. Holley
